Software Enginner - **Full Stack Developer**  
NextJS, ReactJS, Flutter, **ExpressJS, NodeJS, PostgreSQL**  
CSE Graduate, **BRAC University**

Ask me to build anything related to Apps, or full-stack solutions - you'll never hear "*Oh no, I don't know how to do this!*"

## Why I'm the Best Fit for the Circulated Role at Your Organization?

- **Successfully built Hajj Aday, a freelance project for a travel agency, showcasing my ability to deliver real-world web solutions using NextJS and ExpressJS.**
- **Developed an AI-powered ChatBot that acts as a virtual customer service rep using Llama3.2 and company-specific data—ideal for businesses wanting 24/7 intelligent support.**
- **Created a real-time Instant Chat App with Socket.IO, complete with secure OAuth2 login and persistent messaging—highlighting my full-stack capabilities.**
- **Built a collaborative task manager mobile app (ToDo) using Flutter and Express, after achieving 90% in my university's mobile app development elective.**
- **Recently graduated in Computer Science and passionate about building mobile apps with Flutter, web apps with Next.js, or enterprise solutions with Spring Boot—always eager to keep learning and growing.**

## Projects

### Hajj Aday

[NextJS, ReactJS, ExpressJS, NodeJS, PostgreSQL]

[🔗 Visit Site](#)

Hajj Aday is a freelance project I developed for a travel agency in Bangladesh that assists pilgrims throughout their Hajj journey. The app provides a smooth and user-friendly interface. Built with Next.js, it leverages features like optimized image loading, loading screen, and other nextjs features to enhance performance.

### AI ChatBot

[Ollama-Llama3.2, NextJS, ExpressJS, NodeJS, OAuth2, Prisma, ReactJS, PostgreSQL]

[🔗 GitHub](#) [📺 Watch Demo](#)

A full-stack AI-powered chatbot platform that serves as a virtual customer service representative. Built with Ollama-Llama3.2 for intelligent responses, it features secure Google OAuth2.0 authentication, real-time chat interface, and persistent conversation storage.

### Instant Chat App

[NextJS, ReactJS, ExpressJS, NodeJS, Socket.IO, PassportJS, ReactJS, Prisma, PostgreSQL]

[🔗 GitHub](#) [📺 Watch Demo](#)

Instant Chat App is one of my favorite pet projects where I explored real-time communication using WebSocket (Socket.IO). It's a fully functional chat application that supports instant messaging and stores all conversations in a PostgreSQL database via Prisma ORM.

### ToDo: Mobile App

[Flutter, Dart, ExpressJS, NodeJS, PostgreSQL, JWT]

[🔗 GitHub](#) [📺 Watch Demo](#)

ToDo is a personal mobile app project built using Flutter and Dart. It helps users manage their daily tasks and assign them to others with ease. The backend is powered by ExpressJS, which handles the API endpoints efficiently, and PostgreSQL is used for storing all task-related data reliably.

## Education

### B.Sc. in Computer Science & Engineering

**BRAC University**

Summer, 2019 - Fall, 2024

**CGPA: 3.26**

Comprehensive curriculum covering Algorithms, Computer Networks, Software Engineering, Artificial Intelligence, Database Management System, Compiler Design, Computer Graphics, and many more with hands-on project experience. Active participation in research initiatives and complementing academic coursework.

## Licenses & Certifications

### Udemy

[The Complete Flutter Development Bootcamp with Dart](#)  
2024

[Node.js, Express, MongoDB & More: The Complete Bootcamp](#) 2024

[The Ultimate React Course 2024: React, Next.js, Redux & More](#)  
2024

[Master Spring Boot 3 & Spring Framework 6 with Java](#)  
2024

[The Complete 2023 Web Development Bootcamp](#)

2020

[Introduction to HTML5](#)  
2020

[Introduction to CSS3](#)  
2020

## About Me

I'm a developer who finds joy where tech meets human connection. For me, coding isn't just logic—it's a creative craft, much like my morning trail runs. Fresh air clears my mind and sparks ideas in ways a screen never could. When I'm not building or debugging, I'm usually deep in conversation with friends—usually about tech, whether it's a new framework, AI trends, or tools we're geeking out over. Those chats often turn into impromptu brainstorming sessions.

## Interests

Full Stack Development  
Web & Mobile App Development

## Languages

JavaScript  
Dart  
Python  
Java

## Databases

Postgres  
MySQL

## Libraries & Frameworks

Next JS  
React JS  
Flutter  
Express JS  
Tailwind  
Bootstrap
